

TECHNICAL DATA SHEET

FM15 - DIGITAL Oven Thermometer

Using the FM15 Digital Oven Thermometer with Alarm, you won't have to repeatedly open your oven door to check on the internal temperature of cooking food.

The FM15 includes a stainless steel probe on a 1 metre silicone cord which detects the temperature of your food as it cooks. The display unit, which remains outside of the oven, shows the temperature of the food and sounds an alarm to let you know when the food is cooked to your exact preset temperature. The temperature unit has a selectable °C or °F switch and you'll find the displayed temperature digits bold and easy to read.

Key Features

- ✓ Maximum / minimum memory
- ✓ Selectable Temperature Unit °C or °F
- ✓ Adjustable High Alarm
- ✓ Wall mounting, magnetic, velcro or free standing
- ✓ Bracket for probe when not in use
- ✓ Cable 1m long

Applications include display of fridge, freezer, incubator or oven temperature. The adjustable high alarm when exceeded is audible for one minute or can be cancelled by pressing the Clear alarm 'off' button. Both maximum and minimum temperatures are recorded and can be displayed on screen, and easily reset or cleared. When not in use the metal probe can be stored in the side probe clip

Specification

Temperature Range	0°C to +200°C (32° to 392°F)
Accuracy	0°C to +150°C / 32°F to 302°F: +/- 1°C / +/-2°F -18°C to 0°C / -0°F to 32°F & +150°C to +180°C / 302°F to 350°F: +/-2°C / +/-4°F +/-5°C / +/-10°F elsewhere.
Maximum oven temperature for probe's silicone core	+200°C (+392°F)
Resolution	1°F/C
Temperature alarm duration	1 minute with auto-off unless manually turned off while sounding
Power requirements:	one AAA (1.5V) alkaline battery, with expected life of 1 year
Dimensions when vertically oriented for wall mounting:	92mm x 73mm x 22mm
Height when bracket is placed on flat surface and display unit is pivoted up for viewing:	approx. 51 mm, depending on angle of display unit
Probe cord length (not including probe itself):	1 metre
