

Automatic infrared thermal imaging body temperature rapid screening instrument
— Flexible combination, more efficient temperature measurement

Blackbody real-time calibration

High-precision body temperature measurement algorithm

More accurate temperature measurement

Significantly improved stability

Long-distance rapid screening

External large screen display

Blackbody

2~5m

24 hours non-stop testing

Features

24h

Use external power ,
24 hours non-stop working

External display ,
Full video image recording

Non-contact rapid screening ,
Avoid cross infection

High-precision body temperature
measurement algorithm

Main Spec

Resolution	160×120
Temp Range	20℃~50℃
Accuracy	≤0.3℃
CCD	1.3 Million pixel
Working Temp	0℃~40℃
LCD	3.5" LCD
Function	Abnormal temperature alarm, automatic capture, video, photo, etc.

Standard Accessory

Thermal camera, black body, tripod, carrying case, battery,
TF card, video cable, power adapter
